❖ To take the note of new industrial & commercial scenario

The academic year 2021-2022 began with a strategic overview and vision for the year and the discussions on the need for identifying the stakeholder's expectations [students, parents, employers & society]. Faculty teams deliberated on the required strategies, processes, capabilities and appropriate performance measures to realise the vision. The annual report of this year in review reflects in a variety of ways how the department has connected to its vision, primarily at three different levels- faculty development, curriculum and student development.

Significant achievements worth mentioning belong to the area of faculty development. The faculty learning circles provided a platform for professional and intellectual dialogues while on the other hand FPDs, FDP, and QIP raised their curiosities about various concepts and led to widened and strengthened intellect. Ten faculty members have completed MOOC and as many as seven of them are nearing the registration of students of the course.

In the area of research, the importance of producing good quality publication was enunciated and the faculty members were directed from time to time to achieve the same.

With respect to students, the focus was to introduce new teaching methodology that would engage them more thoroughly and enhance the learning experience. Many students-centric initiatives were introduced. The peer learning system was introduced for all the first-year classes. Groups were made blending a mix of gender, learning abilities, language and region. Advanced learners were identified as group leaders to facilitate learning of group members within and outside class-rooms. Leaders directly connect with the class /subject teachers with problems of individual group members that were addressed appropriately. This peer learning exercise proved to be advantageous

in two ways- firstly the students benefitted from the collaborative and cohesive learning and secondly the teachers were able to focus on mentoring. Student mentoring and attendance follow was continuously monitored by all class teachers which reflected in their attendance percentages and performance in examinations.

New initiatives were taken on the students support front. For instance, seven faculty members were appointed as mentors to serve and guide the students with special needs and likewise to cater to the students of international origin. For the students who had back logs, special coaching and remedial classes were arranged which in turn helped them to clear the papers and complete the programme within the stipulated period.

A landmark achievement was the **MOU signed with Sujata Institute of Computer, Pune.** The programme was offered to the B.Voc Retail Management & Software Development students to pursue the Excel certification which is highly recognised among Excel globally. The coaching by industry experts was undertaken in the Online Mode and was open to both the students and faculty members.

The style of administration was to involve faculty members in the decision-making process through discussions and collaboration of ideas. This strategy solicited their committed participation in implementation and execution. Every idea/ initiative of the department was discussed in the department meetings; group-wise deliberations were made and were open to suggestions and criticisms. Groups were consciously made with a blend of seniors and juniors, or based on different specialisations as the case maybe to elicit profound insights. Responsibilities for various activities were delegated on rotation to faculties based on their expertise, ensuring their active involvement and balanced work load for all.
